

THE CEMENTINA STONE

The Cementina Stone series was created from an idea and with the collaboration of **OtrantFatto**, and the colours and shapes of Cementine on the Stone of Soletto.

Ideal for wall coverings for wall in the kitchen, bathroom and other decorative objects (eg. Lamps, tables ect) , each tile is individually made with care from the

Artisan.

Possible natural imperfections demonstrate true authenticity of the stone and an expression of value and artistic quality.

The collection takes up the retro style of the cement tiles, making it timeless and transversal to the anchor of the environments in which it is placed.

To characterise the **Soletto natural stone** cement tiles, is undoubtedly a broad graphical selection that between micro, macro, geometric, floral, classic, vintage, metropolitan offers a mix of patterns that are decidedly appealing and versatile.

Every single piece is **handcrafted** and it is also possible to personalise them with our own designs among those available.

ROMANOPIETRA S.R.L

From the commitment of man and from his strong attachment, **RomanoPietra s.r.l.** have developed the extraction and processing of natural stone.

RomanoPietra s.r.l. has been able to guarantee over the years a solid integration between the art of the master Soletani stonemasons and the precision of evolving technology. From this collaboration between tradition and modernity, production is refined and of high quality which are able to match the suggestive typical decorum of living stone with the functionality of solutions tailored to each living space.

Extracted from the typical quarry site in the locality of Petraro, the Soletto Stone is characterised by its particular resistance to atmospheric elements and reliabilits, qualities that combine to forge, preserve and integrate the beauty of productions over time.

RomanoPietra srl has emerged as a small company with a great willingness to consolidate an image of seriousness and deep knowledge to make commercial relationships of the technique in this particular sector.

The company is located in via Soletto, where the same

quarry is owned by RomanoPietra srl where the extraction takes place with the authorizations required by law.

STYLE AND SIZES

*Cementina
stone*

They are the colour and the geometries to characterise the cementines made with the **natural stone of Soletto**.

Cement tiles made their first appearance in the 1800's with the advent of the industrial revolution and distribution of the use in construction of Portland cement.

Rapidly the evolution of Venetian floors, which were extremely durable was soon being used in the palaces, therefore enriching them in decorum and style.
